## General Comment

To Whom it May Concern:

I am writing as a concerned citizen about the widespread use of glyphosate and the subsequent widespread contamination of the environment, life, food, and even medical products with this chemical and the suite of chemicals used to formulate pesticides that contain glyphosate. I ask that you please revoke the license for glyphosate in light of this contamination and of the troubling effects that its widespread use has resulted in.

I am appalled by the fact that EPA does not require safety testing of the full formulations of glyphosate-containing pesticides. Epidemiological studies have suggested that synergistic effects are an important aspect of the toxicity and ecosystem-wide effects of chemicals. Please require these types of studies.

Again, I am concerned by the ecosystem-wide and human-health effects of glyphosate and glyphosate-containing products. Please revoke the license for glyphosate.

Thank you for considering this comment.

Sincerely,  
Danielle
